

# Monster of a Moth

The Hercules caterpillar eats as much as it can before turning into the biggest moth in the world. Create your own Hercules moth and watch its huge wings flap!

## Materials

- Crayons or colored markers
- Child-safe scissors
- Glue stick
- Drinking straw

## Legend

- Fold line .....  
• Cut line  - - - - -  
• Fold line .....  
• Fold line .....  
• Fold line .....

## Directions

1. Color and cut out the moth.
2. Fold the moth in half along the blue dotted line. Then fold the wings back along the gray dotted lines.
3. Add glue to the GLUE HERE areas.
4. Place the straw along the blue dotted line and press the GLUE HERE areas together to glue the straw into place.
5. Once the glue is dry, grab the straw and “fly” the moth through the air.
